RESUME

*Software Engineer with 3+ years of experience in front-end development, specializing in **React.js** and **TypeScript**. Passionate about building high-performance and scalable solutions that enhance user experience and drive business impact.*

*Throughout my career, I have contributed to challenging, high-impact projects, including robust e-commerce platforms, health management systems, and automation tools. My expertise combines technical excellence with a strong proficiency in **agile methodologies**.*

WORK HISTORY

Software Engineer

RG System, Remote, Brazil

Aug 2022 - Currently

Developing innovative and scalable solutions focused on the healthcare sector, benefiting millions of users and optimizing critical processes. Key projects include::

- **Health Risk Stratification:** A pioneering system analyzing clinical data on hypertension and diabetes, benefiting over 1.5 million patients;
- **Digital Signature Platform:** A secure solution for fast validation of medical and administrative documents.
- **Medication Management:** A robust system for inventory control and distribution across healthcare units.
- **Technologies and tools:** React.js, TypeScript, Docker, Microservices Architecture, Azure DevOps..

Software Engineer

E-plus Agency, Remote, Brazil

Jun 2022 - Mar 2023

Developed and maintained robust e-commerce platforms, collaborating with a multidisciplinary team using agile methodologies to ensure high-quality deliveries. Key contributions include:

- Development of online stores with React.js and VTEX IO, implementing custom features and optimizing UI/UX;
- Creation of responsive interfaces and API integrations tailored to project needs.
- Performance analysis and enhancements, improving efficiency and user experience;
- **Technologies and tools:** React.js, GraphQL, CMS, VTEX IO, modern front-end development practices.

Software Engineer

Bluwe, Remote, Brazil

Aug 2023 - Jun 2024

As Led the redesign of e-commerce platforms with a strong focus on user experience and performance optimization:

- **Redesign of Bluwe Cosmetics Online Store:** Created a premium interface aligned with best UX/UI practices, resulting in a modern, intuitive shopping experience;
- **Development Development and Maintenance:** Implemented custom features, maintained existing components, and supported the VTEX IO admin panel to streamline internal operations;
- **Performance Optimization:** Conducted detailed heuristic analysis, implementing enhancements that significantly improved user retention and e-commerce performance;
- **Technologies and tools:** React.js, VTEX IO, GraphQL, SASS, Styled-Components.

ACADEMIC EDUCATION

Systems Systems Analysis and Development | University São Gabriel da Palha - FASG (2016 – 2018)

Technical Degree in Development | College EEEFM "São Gabriel da Palha" (2013 – 2015)

CERTIFICATIONS

Specialization in Front-end | Rocketseat;

Advanced Front-end Development | Rocketseat;

LANGUAGES

Portuguese - Native;

English - Intermediate (actively improving for professional fluency).
